

AN EPHEMERIS,

SHEWING THE CORRESPONDING DATES . . .

ACCORDING TO THE

ENGLISH, HINDU & MUSULMAN CALENDARS,

FROM A.D. 1851 TO 1895.

COMPILED BY

P. RAGAVA CHARRI,

FIRST OBSERVATORY ASSISTANT.

MADRAS:

HIGGINBOTHAM AND CO.,

By Appointment in India to His Royal Highness the Prince of Wales.

1892.

PREFACE.

GENTLEMEN of the Legal profession have repeatedly suggested to us the publication of an EPHEMERIS shewing the corresponding dates of the English, Telugu, Canarese, Tamil, Malayalam and Muhammedan Calendars, as in their Court business they sadly needed help of this kind. The tables published by Mr. C. P. Brown, more than forty years ago, have long passed out of print; and even when available are found to be of too remote a date to be of much use.

For many years we have endeavoured to secure the services of a competent person to compile for us a work of this kind and it was not until now that we were able to do so in the person of Mr. P. Ragava Charri, the First Observatory Assistant to the Government Astronomer at Madras. This gentleman, with the aid of the experienced Pundit, N. Prasanna Josier, son of late Venkata Subramanya Siddhanti, has prepared a set of tables in continuation of those published by Mr. Brown, *viz.*, from 1851 to 1895 inclusive. We hoped to carry down the calculation to 1900, but materials are not available and will not be for another year or two. Should we at any future date carry out this intention, the tables will be issued as an addendum to this volume and supplied free of charge to all those who may have purchased it.

We trust that our efforts to meet a public want will be duly appreciated; and that before long we will be able to recoup ourselves the large outlay we have incurred in this venture.

H. & CO.

MADRAS, March, 1892.

In explanation of the plan on which these Tables have been compiled, we append, as advised, the remarks prefixed to those published by Mr. C. P. Brown as they apply in their entirety to our Tables, they are as follows:—

EXPLANATION OF THESE TABLES.

The first column states the English date and day of the week. The second gives the Telugu or Canarese year: with its name. According to the era of Vicramaditya it has one numeral, used in Bombay: according to the Salivahana Sacam it has another numeral, used at Madras.

The order of Titles used in Bengal, at present precedes the Southern reckoning by eleven years. Thus A.D. 1850 is in Madras called Sadharana, the 44th Title. But in Bengal it is Durmati the 55th Title.

Each month is divided into the Suddha or Bright, and the Bahula or Wane fortnight. The lunar deviates from the solar reckoning: thus the same solar day sometimes includes the first hour of two lunar days. Hence some days are marked 12-13, &c. The last day of each lunar month is marked 30: which sometimes follows the 14th day or close of the fortnight.

A *tithi* or lunar day deviates from a solar day. For a *tithi* is that period during which the moon travels through twelve degrees of her path. It may commence at any hour or moment of the day or night. It is divided into a number of *gadiyas* or Telugu hours: of twenty-four minutes each.

Each lunar month has the *Sucla Paksham* (or Suddha) which is the bright half beginning with the new moon. The dark fortnight, or Wane, called Krishna Paksham (or Bahula) commences with full moon. Each half contains fourteen days and the day of change. The names of the days will now be given.

Increase Suddha.		Decrease Bahula.	
Padyami	1st lunar day	Padyami	1st
Vidya	2nd	Vidya	2nd
Tadiya	3rd	Tadiya	3rd
Chauthi	4th	Chauthi	4th
Panchami	5th	Panchami	5th
Shashti	6th	Shashti	6th
Saptami	7th	Saptami	7th
Ashtami	8th	Ashtami	8th
Navami	9th	Navami	9th
Dasami	10th	Dasami	10th
E'kadas'i	11th	E'kadas'i	11th
Dwadasi	12th	Dwadasi	12th
Trayodasi	13th	Trayodasi	13th
Chaturdasi	14th	Chaturdasi	14th
Purnami, that is, full moon. ○		Amavasya, change. ●	

In the next column the Tamil date is given: deviating both in names and initial dates from the Telugu method. The days are reckoned not in lunations but regularly from one to 29 or 30. In the weeks the days agree, but bear different names.

In this column the year of the Kali Yugam is also marked.

The Fourth column gives the dates according to the style named from Collam (which we call Quilon) in Malayala.

The last column explains the date of the Hejri, used by Musulmans.
